

## Tiles ADHESIVE & CHWMICALS

### SOLID BOND

#### About us:

At Premium Ceramics, our passion for building excellence goes beyond tiles. With the rise of modern construction needs and diverse tile substrates, we established **\*\*SOLID BOND\*\***—our dedicated division for premium tile adhesives, grouts, and chemical fixing systems.

Engineered with precision and formulated for high performance, **\*\*SOLID BOND\*\*** products are designed to meet the evolving demands of architects, builders, and contractors who require reliability, speed, and long-lasting results

Caption

## Why SOLID BOND?

- **Engineered Bond Strength\*\*:** Unlike conventional cement, our adhesives are modified with polymers and performance enhancers to improve adhesion on smooth, dense tiles such as vitrified and porcelain.
- **Grouts That Perform\*\*:** Low water absorption, high abrasion resistance, excellent color retention, and stress compensation make our grout solutions ideal for both interior and exterior tile applications.
- **Complete Fixing Ecosystem\*\*:** From adhesives and epoxy grouts to tile cleaners and laying tools, we offer a full system tailored for professional results.
- **Safe, Clean & Durable\*\*:** Formulated for low VOC emissions, food-safe applications, and extended tile life.

## Why Choose Tile Adhesives Over Ordinary Cement?

In today's construction landscape, traditional cement no longer meets the performance demands of modern tile installations. While cement works reasonably well on porous surfaces like brick and plaster, it fails to form a reliable bond with modern materials such as vitrified and porcelain tiles, which have exceptionally smooth and non-absorbent backs.

That's where SOLID BOND from Premium Ceramics steps in.

Our tile adhesives are **\*\*highly modified with advanced polymers\*\***, designed to deliver exceptional tensile strength, flexibility, and long-term durability—far beyond what ordinary cement can achieve. They ensure a strong, consistent grip between the tile and substrate, preventing hollow sounds, debonding, or cracking over time. But the system doesn't stop at adhesives.

High-performance grouts\*\* from SOLID BOND provide:

- Excellent adhesion\*\* at tile edges
- Superior abrasion resistance\*\*
- Low water absorption\*\* and \*\*enhanced vapor permeability

These characteristics help grouts absorb and redistribute stress from structural shifts or thermal changes, keeping your installations intact for years.

With SOLID BOND, you're not just fixing tiles — you're investing in performance, precision, and peace of mind.

## **Product Portfolio:**

### **1. Tile Adhesives:**

- o \* CX-1 / VX-1 – For ceramic and vitrified tiles on plastered walls and floors
- o \* CX-2 / VX-2 (White)\*\* – Designed for white marble, glass mosaic, and light-toned tiles
- o \* EX-5 – Heavy-duty adhesive for large format and heavy tiles
- o \* LX-7 – Floor-specific adhesive for direct concrete substrate
- o \* EA-100 – Industrial-grade epoxy tile adhesive

### **2. Grouts & Additives:**

- o \* KE-100 Series\*\* – Premium, glitter, and duet epoxy grouts
- o \* Unsanded Grout\*\* – Ideal for narrow joints with aesthetic finish
- o \* KGA-01\*\* – Admix for added flexibility and strength in variable environments

### **3. Tile Cleaner:\*\***

- o \*TC-1\*\* – Acid-free, surface-safe cleaner for maintaining tile brilliance

### **4. Tools & Accessories:\*\***

- o Tile Leveling System
- o Rubber Mallet
- o Trowel
- o Tile Spacers
- o Carbide Tile Grout Saw
- o Rubber Float
- o Mixer
- o Suction Cup
- o Cordless Tile Vibrator
- o Tile Shaping Template

## o Hole Marker

Built for Global Construction\*\*

SOLID BOND products are manufactured under stringent QC processes and packed for international logistics using export-grade materials. Our adhesives and chemicals are in demand across residential, commercial, institutional, and infrastructure projects.

With certified formulations and performance benchmarking, SOLID BOND ensures every tile stays perfectly in place—today, tomorrow, and for decades to come.

## Trusted by Institutions Across India

Our **SOLID BOND** range of tile adhesives and chemical products is trusted by leading government departments, public sector undertakings, and private developers across India. Our product approvals include usage in projects by **Indian Railways**, **state government infrastructure**, **public schools**, **educational institutions**, and **commercial developers**—a testament to our quality and reliability.

With an unwavering commitment to excellence, **Premium Ceramics** continues to adopt advanced technologies, international standards, and sustainable manufacturing practices. From R&D to end-user performance, every step of our process is geared towards delivering high-performing, durable, and efficient tile fixing solutions.

We believe in being 100% customer-centric—offering not just products, but a complete system of support, technical expertise, and reliability that professionals can trust on every project.
